MUSIC MANAGER — ROSTER & COMMISSION NAVIGATION MANUAL

Complete Guide to Multi-Artist Roster Oversight, Release Scheduling, Split Auditing & Financial Reporting

TARGET AUDIENCE: Artist Managers, Talent Representatives, Booking/Management Agencies & Business Managers

ROLE ACCESS & VISIBILITY SCOPE: The Music Manager profile provides a multi-artist command view across your entire managed roster without exposing raw technical or database administration panels.

KEY ROLE CAPABILITIES & PERMISSIONS

- Unified multi-artist telemetry across all artistes on your management roster
- Ability to submit and coordinate new releases on behalf of any managed artiste
- Transparent auditing of collaborator splits and management commission shares
- One-click CSV royalty statement exports for client accounting and tax reporting

SECTION 01: MONITORING YOUR ARTIST ROSTER PERFORMANCE

SITE NAVIGATION PATH: Left Sidebar -> Command Overview

Track combined streaming velocity and royalty inflows across all artistes under your management umbrella.

1. Review the active roster banner at the top of the Command Overview showing your managed artistes (e.g., Kampala Nights, Sora Vane, Nyx & The Architect).

2. Inspect the "Store Delivery Pipeline" panel on the right to verify whether upcoming client releases are "In Review" or "Delivered" to stores.

3. Use the status filter tabs (All / Delivered / In Review / Draft) in the Catalog Table to spot releases that need attention before release day.

PRO TIP: Use the 30D and 90D Royalty USD chart view to forecast quarterly management commissions accurately.

SECTION 02: COORDINATING & SUBMITTING RELEASES FOR MANAGED ARTISTES

SITE NAVIGATION PATH: Left Sidebar -> Distribute Release

Prepare release metadata, upload final masters from your mastering engineer, and lock collaborator splits on behalf of your client.

1. In Step 1, enter the managed artiste’s name under "Primary Artist" and set the target global release date.

2. In Step 2, upload the final 24-bit WAV masters and verify that songwriter legal names are entered accurately for publishing registration.

3. In Step 3, include both the Primary Artist share, any Producer/Feature shares, and your Management Commission split if collected at source.

PRO TIP: Always enable YouTube Content ID & TikTok Sound Library in Step 4 to maximize short-form video revenue for your roster.

SECTION 03: AUDITING ROYALTY SPLITS & EXPORTING CLIENT STATEMENTS

SITE NAVIGATION PATH: Left Sidebar -> Royalties & Splits

Verify per-release earnings breakdowns and generate official accounting statements for your artistes.

1. In the "Automated Royalty Split Tree" panel, use the dropdown selector to switch between each release on your roster.
2. Review the exact USD amount earned by the Primary Artist, Producers, and Featured Artists.
3. Click "Export Official CSV Statement" to download a full line-item breakdown by DSP store, territory, stream count, and net USD.

PRO TIP: Filter the bottom Statement Ledger by store (Spotify, Apple, Beatport, Audiomack, TikTok) to see which platform drives the highest per-stream payout for each artist.

FREQUENTLY ASKED QUESTIONS (FAQ)

Q: Can I manage multiple artistes from a single Music Manager profile?

A: Yes! Your Music Manager profile aggregates releases, streams, and statements for all artistes assigned to your management roster.

Q: How can I onboard a new artiste to my roster?

A: Navigate to "Profiles & Manuals" in the sidebar and click "+ Create New Profile" or add their name when submitting a new release.
